+66999608955 | Khon Kaen, Thailand

kanyapat.chaiphad@gmail.com | <https://www.linkedin.com/in/kanyapat-chaiphad> | [GitHub](#)

4th-year Computer Science student with hands-on experience in full-stack web application development and software testing. Skilled in JavaScript, Node.js, Express.js, React, Next.js, RESTful API development, database integration and role-based access control. Experienced in building web applications and developing automated tests using Robot Framework. Seeking a Full Stack Developer opportunity to apply both development and testing experience to build reliable and maintainable web applications.

EDUCATION

Bachelor of Science in Computer Science	2023 – Present
Khon Kaen University, College of Computing	GPA: 3.57/4.00 Expected Graduation: November 2026

SKILLS

Programming & Web Technologies	JavaScript (Node.js, Express.js), Java (Spring Boot), React, Next.js, Kotlin, HTML, CSS
Backend & Databases	RESTful API, MySQL, PostgreSQL, MongoDB, Supabase, Prisma
Software Testing & Tools	Manual Testing, Test Case Design, UAT, Unit Testing, API Testing (Postman), Test Automation (Robot Framework, SeleniumLibrary), Git, GitHub

PROJECT

Pai Nam Nae – Carpooling Web Application Testing GitHub	2026
(Nuxt.js, Express.js, Robot Framework, Prisma, PostgreSQL, Supabase)	
- Developed a full-stack carpooling web application with Passenger, Driver and Admin workflows. - Developed RESTful backend APIs using Express.js and integrated PostgreSQL database with Prisma. - Implemented role-based access control for different user roles and permissions. - Integrated frontend, backend APIs, database and file upload functionality. - Developed automated UAT tests and unit testing using Robot Framework and SeleniumLibrary. - Tested key workflows including reporting, case management, search/filter, file upload and access control.	
Learning Management System with Course Recommendation GitHub	2026
- Developed a web-based LMS using React and Supabase, including course search, course detail and user profile features. - Implemented user authentication and integrated the frontend with Supabase database services. - Developed a Python-based course recommendation system using user profile data and course information. - Integrated personalized course recommendations into the application based on user profile and course information. - Developed a chatbot prototype to support users in finding and navigating course information.	
Student Short Notes Web Application (Express.js, MongoDB) GitHub	2025
- Built a RESTful backend system using Express.js and MongoDB. - Implemented RBAC and developed an admin dashboard for monitoring users and reports.	

EXPERIENCES

G-Able — Software Tester Intern IGA Project (KBTG)	April – October 2026
- Performed functional and manual testing for an enterprise User Access Management (UAM) system. - Analyzed system requirements and end-to-end workflows across source systems, applications, and target systems. - Conducted Source-to-Target validation and Parallel Run to investigate data discrepancies across system flows. - Prepared test data, designed test scenarios, reported defects and collaborated with related teams to verify fixes.
